GLOBAL SECURE MESSAGING SOLUTIONS

NetSfere provides enterprises with a private, highly secure, reliable, centrally managed and controlled, cloud-based mobile messaging service backed by 2,000 years of combined messaging experience delivering trillions of messages globally.

Gain Total Control of Your Business Communications Anytime, Anywhere, Any Device

SECURITY

Protect Your Data and Intellectual Property

Built from the ground up with multiple layers of protection, NetSfere's industry-leading end-to-end encryption protects your sensitive business data and intellectual property ensuring a secure communication environment for the enterprise.

CONTROL

Keep I.T. in the Driver's Seat

NetSfere provides IT administrators with a powerful centralized administrative control panel to manage all aspects of the communication platform. IT administrators can provision, manage & enforce end-user policies and privileges as mandated by the enterprise, providing total control to IT teams.

COMPLIANCE

Stay Compliant and Safeguard Your Business

NetSfere provides all the necessary administrative, physical and technical safeguards, enabling your enterprise to be completely compliant with the regulatory authorities. NetSfere allows enterprises to meet the most demanding and evolving global compliance and privacy requirements of GDPR, HIPAA, FINRA, SOX, DFA, and more.

ENGAGEMENT

Drive Productivity Gains

NetSfere with **SecureMeet** drives collaboration and productivity by empowering employees to communicate securely and safely with their preferred channels for communication – text, voice and video in an instantaneous, contextual and highly engaging mobile messaging environment.

Simple & Intuitive to Use

- Simple to set-up with only name and email address
- Connect and communicate with co-workers via text, voice, or video
- User friendly & intuitive interface

Enhanced Voice and Video

- Next generation media platform for enhanced collaboration
- Instant contextual collaboration via secure group calls and screen sharing
- Team communication via Live broadcasts and video calls

Advanced Instant Messaging

- Message forwarding with sender information preservation
- Real-time message disposition
- Instant messaging using a HITRUST CSF-certified Nuance® speech-to-text function
- Push notifications and multi-person typing indicator
- Reply-in-context for selective responses to specific messages
- Controlled and compliant message deletion

Managing Participants in a Conversation

- Add or remove any number of participants anytime
- New participant automatically receives the full conversation history

Documents:

- Increase productivity with quick access to all documents - all in one location right from the main navigation area
- Search by name or filter by document type to locate what you need
- Limit searches by conversation for faster access

NetSfere SecureMeet

- Secure and frictionless meetings with internal and external users over voice and video
- Eliminate cybersecurity risks with virtual meetings with MFA and admission controls
- Use Outlook & other calendar integrations to schedule SecureMeet sessions with ease

Meeting Point URLs:

- Setup workflows that allow external users to connect with individual or groups
- Unique URLs for single-click communication.

NetSfere Lifeline™ Emergency Messaging

- Reliable communication for critical notifications, including life threatening situations, natural disasters, pandemics etc.
- Emergency alert system with attention-grabbing full screen alerts and audible tones

Identity Management:

- SSO using ADFS or Azure Cloud
- Synchronize users using Microsoft Active Directory

Architected from the Ground-Up for Professionals with Multiple Devices

- Instantly synchronize messages between user's phone, tablet and laptop
- Users can switch seamlessly between all of their devices and web browsers

Control Enterprise Data

- Manager users: - enable or disable access to employee accounts anytime
- Apply security policies to control document sharing
- Organize users in teams for onboarding and increased collaboration
- Automatic app caching eliminates the need to delete messages
- Support for iOS, Android, Windows, Mac and Browsers

Multiple deployment options - Cloud or On-Premise

- The same secure solution available on the cloud or on-premise without compromising access
- Data is never lost. Misplaced devices can be wiped clean
- Remotely wipe stored messages and attachments
- Configurable device screen locks for enhanced security

Device-To-Device Encryption

- Every message and attachment is secured with 256 bit encryption
- Uninterrupted end-to-end encryption

Secure Ecosystem Collaboration

- Employees can collaborate and communicate securely with their ecosystem of outside vendors, partners and clients using the guest access feature

GDPR Compliant Solution

- Fully compliant with latest GDPR standards including ISO 27701 certification
- EU locations to reduce global data transfers
- Global Compliance with HIPAA, SOX, DFA and FINRA

Securely Managed APIs

- Simple yet powerful APIs that enable secure workflows and custom integrations

Scalability

- Highly Scalable according to enterprise requirements

TAP INTO THE POWER OF SECURE MESSAGING

About NetSfere:

NetSfere provides next generation messaging and mobility solutions to carriers and enterprises globally including its enterprise-grade, secure mobile messaging platform NetSfere Enterprise. NetSfere Enterprise is a secure enterprise messaging service and platform which provides industry-leading security and message delivery capabilities, including global cloud-based service availability, device-to-device encryption, location-based features and administrative controls. The service is also offered globally in partnership with Deutsche Telekom GmbH, one of the world's leading integrated telecommunications companies, and with NTT Ltd., a global information communications & technology service provider, to jointly offer NetSfere to its worldwide customers. NetSfere is also compliant with global regulatory requirements, including GDPR, HIPAA, Sarbanes-Oxley, ISO 27001 and others. The company's technology supports more than 500 million subscribers and over one trillion messages per year. NetSfere has offices in the United States, Germany, UK, Singapore and India.
