

ENABLING COMMUNICATION.

MESSAGING, VOICE, VIDEO IN
ONE SECURE, COMPLIANT, PRIVATE
ENTERPRISE-GRADE PLATFORM

INDUSTRY'S FIRST AND ONLY QUANTUM-PROOF
ENCRYPTED COMMUNICATION PLATFORM

Gain Total Control of Your Business Communications Anytime, Anywhere, Any Device

SECURITY

Protect Your Data and Intellectual Property

Built from the ground up with multiple layers of protection, NetSfere's industry-first Quantum-Proof Communication Platform powered by ML-KEM 1024 end-to-end encryption protects your sensitive business data and intellectual property ensuring a secure communication environment for the enterprise.

CONTROL

Keep I.T. in the Driver's Seat

NetSfere provides IT administrators with a powerful centralized administrative control panel to manage all aspects of the communication platform. IT administrators can provision, manage & enforce end-user policies and privileges as mandated by the enterprise, providing total control to IT teams.

COMPLIANCE

Stay Compliant and Safeguard Your Business

NetSfere offers the comprehensive administrative, physical, and technical safeguards essential for your enterprise to adhere to regulatory authorities. It empowers enterprises to fulfill the stringent and dynamic global compliance and privacy mandates of GDPR, HIPAA, SOX, DFA, SOC2, FedRAMP, and other relevant regulations.

ENGAGEMENT

Drive Productivity Gains

NetSfere with **SecureMeet** drives collaboration and productivity by empowering employees to communicate securely and safely using their preferred channels for communication – text, voice and video in an instantaneous, contextual and highly engaging mobile messaging environment.

Simple & Intuitive to Use

- Simple to set-up with only name and email address
- Connect and communicate with co-workers via text, voice, or video
- User friendly & intuitive interface

Enhanced Voice and Video

- Next generation media platform for enhanced collaboration
- Instant contextual collaboration via secure group calls and screen sharing
- Team communication via Live broadcasts and video calls

Advanced Instant Messaging

- Message forwarding with sender information preservation
- Real-time message disposition
- Instant messaging using a HITRUST CSF-certified Nuance® speech-to-text function
- Push notifications and multi-person typing indicators
- Reply-in-context for selective responses to specific messages
- Controlled and compliant message deletion

Net-C AI Assistant

- AI capabilities delivered securely on a compliant NetSfere Cloud Infrastructure
- Net-C AI-enabled enterprise assistant built independent of 3rd party AI
- AI powered features like Enterprise Data Learning, Meeting Notes, and Message Summarization that boosts productivity and user engagement

Documents

- Increase productivity with quick access to document view
- Search by name or filter by document type to locate what you need
- Limit searches by conversation for faster access

NetSfere SecureMeet

- Secure and frictionless meetings with internal and external users over voice and video
- Eliminate cybersecurity risks with virtual meetings with MFA and admission controls
- Seamless scheduling with Outlook, Google & other calendar integrations

NetSfere Groups and Meeting Point URLs

- Setup workflows that allow external users to connect with individuals or groups
- Unique URLs for single-click communication.

NetSfere Out-of-Band Communication

- Emergency messaging to ensure business continuity when primary systems are off-line or degraded
- Carrier-grade infrastructure that delivers messages over SMS, MMS, Email and other communication channels

Identity Management

- SSO using ADFS or Azure Cloud
- Synchronize users using Microsoft Entra ID or Active Directory

Quantum Safe End-To-End Encryption

- Post-Quantum Cryptography using NIST-approved ML-KEM 1024 encryption
- Supplemented with quantum-safe AES 256-bit encryption for unparalleled security

Enterprise IT Control

- Manage users: - enable or disable access to employee accounts anytime
- Configure data retention, security and document control policies
- Mandate 2FA/MFA, device screen locks and biometrics for enhanced security
- Organize users in teams for onboarding and increased collaboration
- Deploy apps in MEM/EMM controlled environments
- Remotely wipe enterprise data on managed and unmanaged devices
- Mobile (iOS, Android), Desktop (Windows, Mac) and Web platforms

Compliance that Safeguards Businesses

- Global Compliance with FedRAMP, SOC2, HIPAA, GDPR, SOX, DFA, FINRA and others
- ISO 27001 and 27701 certified with deployments on ISO 27017, 27018, and CSA compliant CSPs
- Data Sovereignty

Multiple deployment options - Cloud or On-Premise

- The same secure solution available on the cloud or on-premises without compromising access

Secure Federated Ecosystem

- A trusted eco-system to connect seamlessly with partners, vendors & guests
- Defined governance and trust policies for controlled collaboration
- Administrative controls for federation membership lifecycle management

Architected for Professionals with Multiple Devices

- Instantly synchronize messages between users' phones, tablets and laptops
- Users can switch seamlessly between all of their devices and web browsers

Securely Managed APIs

- Simple yet powerful APIs that enable secure workflows and custom integrations

Scalability

- A highly scalable infrastructure that can grow to meet any enterprise's current and future requirements

TAP INTO THE POWER OF SECURE MESSAGING

About NetSfere:

NetSfere provides next generation messaging and mobility solutions to carriers and enterprises globally including its enterprise-grade, secure mobile messaging platform NetSfere Enterprise. NetSfere Enterprise is a secure enterprise messaging service and platform which provides industry-leading security and messaging delivery capabilities, including global cloud-based service availability, device-to-device encryption, location-based features and administrative controls. The service is also offered globally in partnership with Deutsche Telekom GmbH, one of the world's leading integrated telecommunications companies, and with NTT Ltd., a global information communications & technology service provider, to jointly offer NetSfere to its worldwide customers. NetSfere is also compliant with global regulatory requirements, including GDPR, HIPAA, Sarbanes-Oxley, ISO 27001 and others. The company's technology supports more than 500 million subscribers and over one trillion messages per year. NetSfere has offices in the United States, Germany, UK, Singapore and India.
